PARTY PLATTER

The re-think of the Party Platter helps to evolve with snowboarding's non-stop progression.

HIGH

FIVES

PARTY PLATTER

Requested by our Team, we've redesigned the Party Platter from the ground up with all-terrain enjoyment on the mind. As a brand, it was important for us to stay true to the personality and DNA of the Party Platter; we just wanted to evolve on this model as snowboarding as a whole has continued to evolve. In our re-think of the Party Platter, we've updated the Baseline™ to our Combination Camber profile to ensure more energy in and out of turns without sacrificing the loose and surfy feel that the Party Platter is known for. This, coupled with the Ollie Bar™, gives the Party Platter good snap without feeling rigid and dull.

The second step of the process was to extend the running length of the Party Platter to ensure that more edge was on the snow when turning, resulting in a more stable ride. We added volume to the tail to help give some substance to those slashes and aid in riding switch. Lastly, we've added more sizes to accommodate riders on the smaller side, starting as small as 138cm. For a shorter, wider board that strikes the balance between performance and playfulness, the Party Platter has all of the benefits needed to bring a whole new dimension for riding and turning your snowboard.

MANIFEST

An instant Team favorite, the Manifest is fluent in versatility and is truly a one board quiver-killer. A testament to K2's commitment to backcountry snowboarding and the freeride category, the Manifest is packed full of some of the best technology in snowboarding - making it agile, stable, and powerful. To perfect our new flagship, we relied heavily on the input from our most demanding Team riders - Curtis Ciszek, Matt Belzile, Jody Wachniak, and Johnny Brady. They spoke and we listened, which helped us solidify the Manifest as a rugged do-it-all snowboard that crushes whatever you put in front of it with unparalleled expertise.

MANIFEST

The Manifest is for riders putting their gear through the harshest conditions, weather or not.

The Manifest pays tribute to fallen K2 Snowboarding rider Aaron Robinson in both name and personality. Dynamic, fun loving, and progressive, the Manifest hits the freeride nail right on the head.

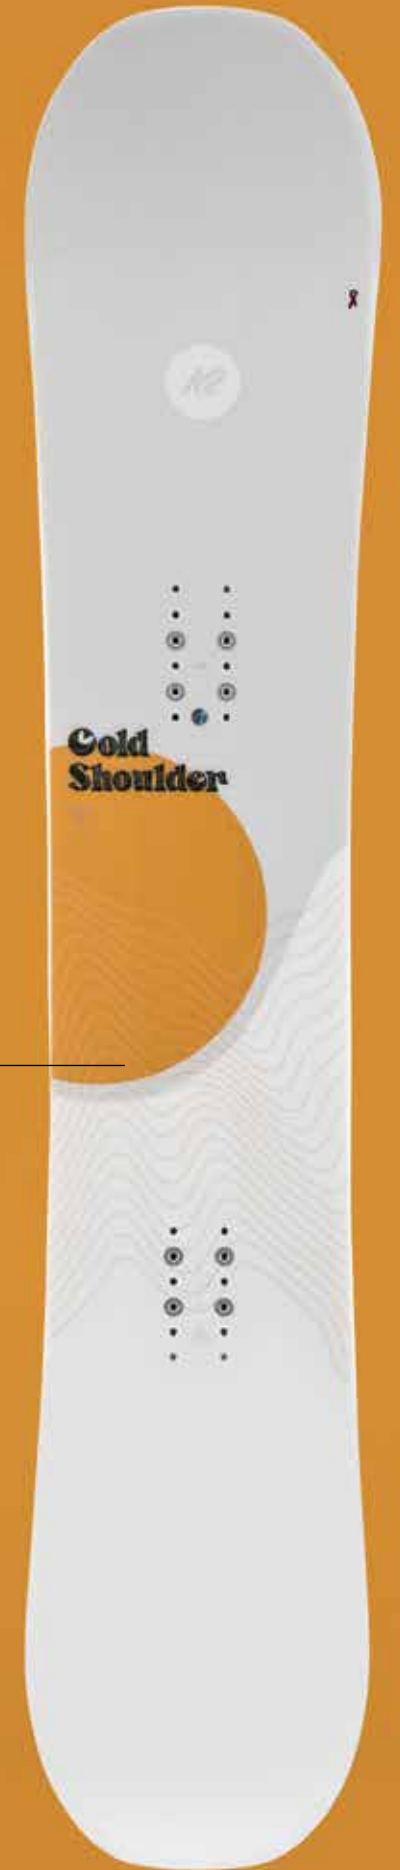

First formed in 2003, the Alliance™ is the most established women's feedback and design group in the industry. 2019 marks a major turning point in the energy and direction of the Alliance™ with the addition of new members. This new energy can be seen in each in every one of our women's products.

COLD SHOULDER

We know that it might sound a bit cliché, but the Cold Shoulder is truly the one board that can do it all. A Directional Camber Baseline™ helps make the Cold Shoulder feel lively and energetic in and out of turns and stable on hard pack. A set back stance and a slightly tapered outline aids in easy turn initiation and effortless float in powder. Inside, we've added our women's-specific Rhythm Core™ and our Integrated Carbon Glass™ to ensure that this all-terrain ripper is ready to take on anything that is put in front of it.

COLD SHOULDER

Designed to be a fully-fledged all-mountain explorer specifically for women.

THE MEDIUM/ JAKE KUZYK

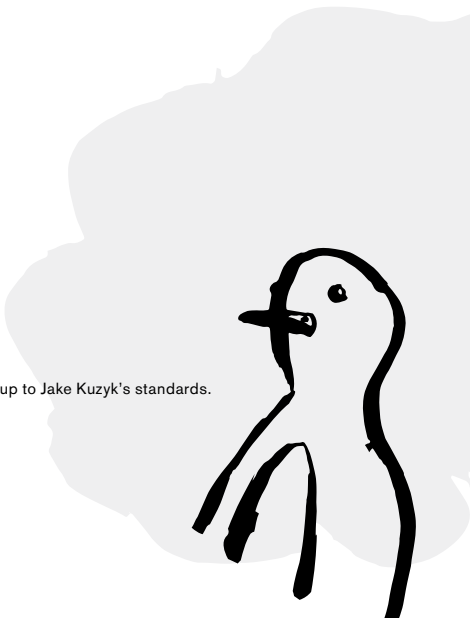

K2

A streamlined take on a classic freestyle snowboard, the Medium is the perfect intersection of refinement and high performance. The concept of the Medium came from the mind of Jake Kuzyk himself. A true snowboarder's snowboarder, Jake is understated, meticulous, and incredibly hard working, and our engineers set out to mirror those distinctive traits when creating the Medium.

Through a few revisions, we worked with Jake to find the perfect combination of a classic outline, a snappy core, and an overall nimble feel - and out came the Medium. A sintered base, snappy trim-blend core, Carbon DarkWeb™, and an bombproof Inked Glass™ topsheet all work together to create a premium twin-tip that packs a bunch of power and can take on on any task.

The epitome of premium freestyle, the Medium is built to live up to Jake Kuzyk's standards.

JAKE KUZYK

Arguably one of the most influential snowboarders of his generation, Jake Kuzyk has carved his own path in snowboarding through originality and staying true to his beliefs - both on and off snow. He's been a part of K2 Snowboarding for close to a decade and his influence weighs heavy on our brand. Detail oriented in everything that he does, his approach to snowboarding cloaks complexity and power in a seemingly subtle and effortless jacket.

RUSS POPE

When creating the Medium, we knew that we needed to reach out to Russ Pope. Russ' artwork is the perfect compliment to Jake's style and snowboarding, as well as K2 Snowboarding as a brand - the product of the right amounts of raw talent, hard work, and attention to detail. Hailing from Central California and currently calling New England home, Russ Pope has been experiencing the world through art and skateboarding for more than four decades. Learn more about Russ Pope and his artwork: <https://www.russpope.com>

For the open minded. The Enjoyers Collection is an assortment of slope tools created with fun on the mind and the need to provide truly unique turning experiences.

SIMPLE PLEASURES

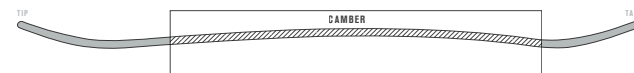

The Simple Pleasures was created for those that love the feeling of a long powder turn and setting rail on a groomed run. A Directional Camber Baseline™ and tapered shape works in harmony with a wider profile, making it feel right at home floating through the deep stuff or weaving through trees.

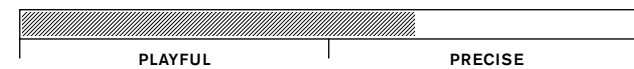

KEY FEATURES

- Directional Camber Baseline™
- Bambooyah™ Core
- Biax Glass
- Volume Shift™
- Carbon Infused 5500 Sintered Base
- 2x4 Inserts

SHAPE / BASELINE

FLEX / FEEL

SIZE CM	EFF. EDGE CM	TIP/WAIST/TAIL MM	SIDECUT M	STANCE IN	SETBACK IN	WT RANGE LBS	WT RANGE KG
151	111.60	30.9 - 26.1 - 28.7	7.4	20"	0.75"	110 - 190+	50 - 86+

OVERBOARD

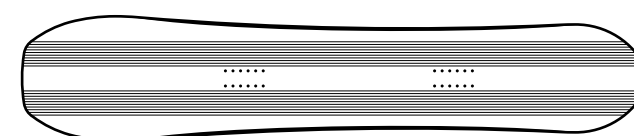

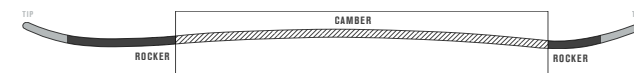

The Overboard was created with the philosophy that there is truly one size to rule them all. The tapered profile and narrow tail of the Overboard are rounded out by a broad nose for float - it is also packed with twenty stringers of tip to tail carbon woven into the fiberglass for unwavering stability.

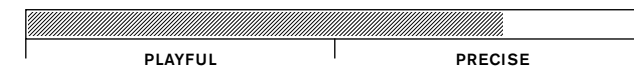

KEY FEATURES

- Directional Combination Camber Baseline™
- BAP Core
- ICG 20 Triax Glass with Carbon
- Volume Shift™
- Sintered 4000 Base
- 2x4 Inserts

PARTY PLATTER | ALL NEW

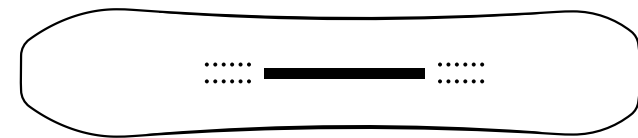

The updated Party Platter features a longer running length and more volume in the tail than its predecessor. Requested and tested by our Team, we've added a little bit of snap by coupling our Ollie Bar™ with a Directional Combination Camber Baseline™ and made switch riding more friendly by reducing taper.

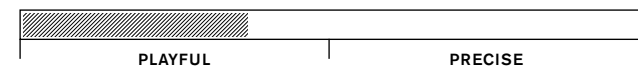

KEY FEATURES

K2
MODEL: 1649
DATE: 18-5-8

MEN'S SNOWBOARDS

We've been making snowboards for more than three decades, and have always strived to use the best materials and processes possible to give our customers a quality ride. Each and every model in the 19/20 collection was designed from experience and shaped for your amusement.

JOYDRIVER

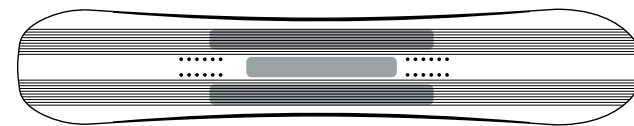

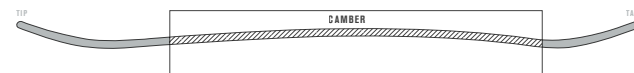

The K2 Joydriver is stable, precise, and isn't scared to take the wheel in the most intense situations. Full of technology to keep delivering for the most demanding snowboarders, the Joydriver is packed full of a bombproof Bambooyah™ core, durable Honeycomb™, and ICG™ for added snap and stability.

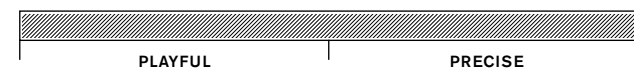

KEY FEATURES

- Directional Camber Baseline™
- Bambooyah™ Core
- ICG 20 Triax Glass with Carbon
- Honeycomb™
- Sintered 4000 Base
- 2x4 Inserts

MEDIUM | ALL NEW

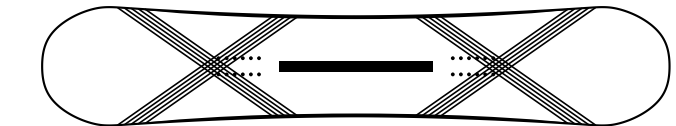

We worked with Jake Kuzyk to construct a snowboard that lives up to his standards - so we built the Medium. Packed with carbon to be snappy, a Twin Cambered Baseline™ to remain nimble, and our Inked Glass™ topsheet to make this board lightweight and durable: the Medium is the epitome of premium freestyle.

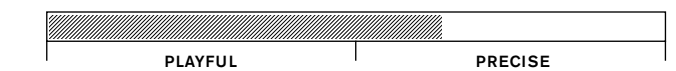

KEY FEATURES

- Twin Camber Baseline™
- BAP Core
- Ollie Bar™
- Inked Glass™ Topsheet
- Triax Glass
- Carbon DarkWeb™
- Sintered 4000 Base
- 2x4 Inserts

BOTTLE ROCKET

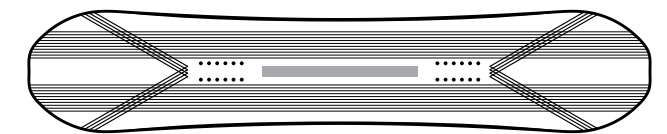

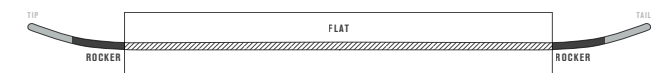

Built on a mid-wide outline with a long sidecut radius, the Bottle Rocket is a team favorite for street missions, park laps, and those slushy summer days on the glacier. A predictable Twin Rocker Baseline™ makes spinning and pressing a breeze, while carbon additions give the Bottle Rocket the perfect amount of snap.

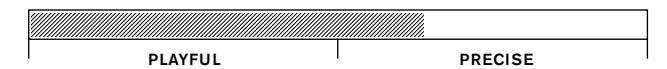

KEY FEATURES

- Twin Rocker Baseline™
- BAP Core
- ICG 20 Triax Glass with Carbon
- Ollie Bar™

RAYGUN | NEW SHAPE

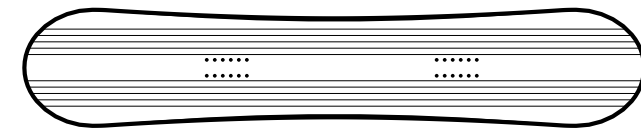

With a new shape for 2019, we aimed to put a modern take on a classic outline. Designed to be forgiving and fun, the Raygun doesn't skimp on performance either: it comes packed with our ICG™ 10 Carbon Glass - integrated carbon stringers running the length of the board for added pop and stability without any rigidity.

KEY FEATURES

- Directional Rocker Baseline™
- Aspen Core
- ICG 10 Biax Glass with Carbon
- 2000 Extruded Base
- 2x4 Inserts

RAYGUN POP | ALL NEW

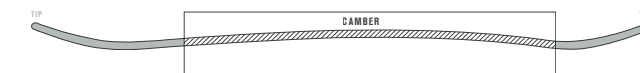

We took the Raygun construction, updated the shape and complemented it with a Directional Camber Baseline™ - providing riders with increased control and elevated confidence. Tip to tail carbon stringers aid in pop and stability, and a low maintenance base makes this board ready to rip out of the box.

LEWISTON | ALL NEW

A new silhouette from K2 Snowboarding, the Lewiston is a highly-responsive, mid-flexing boot. An articulating cuff helps to eliminate shell distortion and a 3-Point Harness wrapped around heat moldable Intuition® Control Foam 3D Liner provides an unreal fit while keeping you warm, dry, and comfortable. To top it all off, our new RollSole outsole yields extra mobility in a best-of-both-worlds package; rubber for performance, phylon for weight reduction.

DARKO

The face of freestyle for over a decade, we've updated the tried-and-true K2 Darko with our new RollSole outsole to reduce weight and add lateral mobility (for tweaking grabs, obviously). Smooth flexing thanks to its articulated cuff, the Darko features an Intuition® Comfort Foam liner, BOA® Mobility Conda™ heel harness, and a dependable traditional lacing system.

YOUTH PRODUCT

The products that make up our Youth offering are designed specific for the needs of smaller, lighter riders and are geared for progression. Most importantly, these are key components to parental avoidance.

THE
FUTURE

IS NOW

VANDAL

A perfect companion for groms, the K2 Vandal youth snowboard loves buttering around the park and laying down curves. We did the hard work and built the Vandal with a Twin Rocker Baseline™ and predictable sidecut - so all the next generation needs to worry about is cutting the lift line.

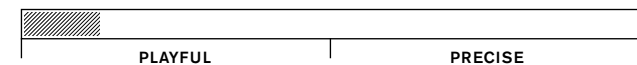

KEY FEATURES
 Twin Rocker Baseline™
 Aspen Core
 Biax Glass
 2000 Extruded Base
 4x4 Inserts

DESIGN

VENTILATION

With multiple ventilation solutions, K2 helmets are designed to keep you cool when the sun is shining, and warm when it's cold. It's science.

COMFORT

Multiple liners, an unparalleled fit system and some of the best foam varieties in the industry give K2 helmets a custom comfortable feel on the head.

CONSTRUCTIONS

HYBRID

This unique construction features the best of both In-Mold and Hard-Shell constructions. The primary In-Mold construction makes the helmet incredibly light, while the secondary Hard-Shell upper allows for more advanced Active Matrix Venting and increased durability.

IN-MOLD

In-Mold is the premium construction for ultra-lightweight performance and is characterized by an EPS liner that is molded directly to a lightweight poly-carbonate (PC) shell. The result is a construction so light you'll forget it's even there.

HARD SHELL

Hard-Shell helmets are built to last and will look good no matter how many trips they make in and out of your gear bag. Hard-Shell helmets protect you from impact thanks to lightweight EPS foam bonded to an injection molded and durable ABS shell.

LINER SYSTEMS

CONVERTIBLE FULL WRAP LINER

Same coverage as a full-wrap but easily pops out, leaving the fit system and minimal padding to accommodate warm days and wearing a thin beanie under the helmet.

FULL WRAP LINER

A comfortable, washable, full-coverage, breathable liner design that wicks away moisture to prevent overheating and seamlessly integrates fit and audio systems.

TECH FORM LINER

Compression formed, precise fit liner with removable ear pad and neck roll for a convertible customized fit.

BOA®

All the benefits of the 360 K2Dialed Fit System with the precision and quality that you have come to expect from BOA® Technologies.

360 K2DIALED

The 360 K2Dialed Fit System is an evolution of the K2dialed Fit System, delivering unparalleled comfort around your entire head. An intricate web design results in 360 degrees of even pressure distribution for a secure and snug fit that you customize with

CUSTOMIZATION

Removable ear-pads, liners, and multiple color way combos and designs. K2 has something to fit your style.

DUAL ACTIVE

Perfect combination of user/switch regulated Active Matrix Venting and integrated Passive Channel Venting.

PASSIVE CHANNEL VENTING

Channels on the inside surface of the EPS direct air-flow between your head and the helmet, removing moisture and excess heat for all day comfort.

ACTIVE MATRIX

Climate control at the flip of a switch, Active Matrix Venting allows you to regulate the airflow of the helmet vent system with the push of a finger.

K2DIALED

The K2Dialed Fit System creates a custom-fitting helmet no matter what your head shape. An ergonomically inspired three-point adjustable interface maximizes fit and customization with the twist of a dial. This allows for the ultimate convenience of being able to make fit adjustments on the fly.

BLUETOOTH COMPATIBLE

All K2 Helmets now are compatible with Outdoor Tech® Blue Tooth audio systems, as well as other after-market audio options.

BIKE CERTIFIED

Certified by North American bicycle helmet safety standard and European bicycle and skateboard helmet safety standard on certain models.

MAGNA SNAP

Magnetic retention clip that easily flips up and over the goggle strap for a secure hold that you don't have to fumble for.

REMOVABLE EAR PADS

Ability to easily remove ear pads for reduced bulk while retaining the fit system.

REMOVABLE GOGGLE AND HEADLAMP CLIPS

Customized fit for tool-free, on-the-go versatility.

WARRANTY

We stand by our snowboards. Unless otherwise stated, K2 places a three (3) year warranty on all 2019 boards, guaranteeing that they are free of defects in regards to materials or craftsmanship.

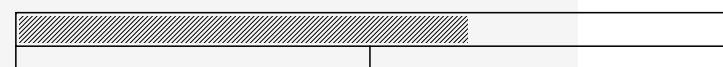

3 YEAR WARRANTY
All K2 Snowboards come with a three (3) year warranty against manufacturer's defects.

5 YEAR WARRANTY
All snowboards featuring our Bambooyah™ Core come with a five (5) year warranty against manufacturer's defects.

PERFORMANCE & FEEL

The materials and technology found on the inside of each one of our snowboards affect the personality and performance. When it comes to choosing the right snowboard for you, it is important to take height, weight, stability, power transfer, sidecut, flex, and more into consideration. Flex is often seen as the most important - as it will dictate how you are able to control your board on-snow. Simply put, our flex spectrum runs from PLAYFUL to PRECISE.

PLAYFUL

In general, more PLAYFUL boards are great for learning how to link turns, press rails, and overall board handling.

PRECISE

In general, more PRECISE boards are often more stable at speed, have more pop, and have more energy than their playful counterparts.

RAILS/PARK
Boxes, rails, bonks, and jibs on-hill or in the streets.

JUMPS/PIPE
Kickers, hips, transitions, and stunt-ditches

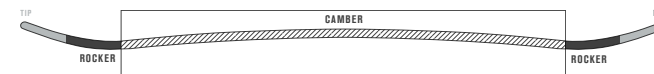

GROOMERS
Fresh corduroy.

POWDER
That deep, deep white goodness.

BASELINE™

Simply put, Baseline™ is the line that the steel edge makes on the bottom of the snowboard. This "line" can be described as Rocker, Camber, Flat, or any combination of these. K2 offers multiple Baseline™ options, hand picked by model and tailored to work in harmony with the materials and core profile to ensure the best possible riding experience.

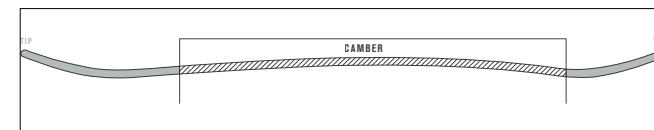

COMBINATION CAMBER BASELINE™

The best of both worlds. By blending both traditional Camber and Rocker profiles, Combination Camber gives you all the benefits of both; the pop and precision of camber, and the float and predictability of rocker. Available in Directional and Twin Combinations.

DIRECTIONAL ROCKER BASELINE™

An all-purpose profile designed to be the perfect companion for the all-terrain snowboarder. Directional Rocker Baseline™ has a medium-rise in the tip and a lower rise in the tail, allowing for effortless turns on hardpack and ample float in soft snow and crud.

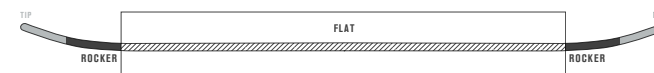

DIRECTIONAL CAMBER BASELINE™

Directional Camber Baseline™ | Response? We got that. Our Directional Camber Baseline™ is known for its pop and response, and is favored by those looking for a little more precision in their ride. A little bit of rise in the tip and tail allow for effortless turns on hardback and ample float in soft snow and crud.

TWIN CAMBER BASELINE™

A versatile twin-rocker design built to dominate any freestyle line. Just enough rise in the tip and tail to create a loose, buttery feel without sacrificing pop and response.

FREESTYLE ROCKER BASELINE™

A versatile twin rocker design built to take on any freestyle line. Just enough rise in the tip and tail to create a loose, buttery feel while maintaining instant response and pop.

CATCH-FREE ROCKER BASELINE™

By bringing the contact points out of the snow, this beginner-friendly design ensures linking turns without a catch. This small amount of rocker in the tip and tail aids in more confidence throughout the learning curve and unlocks faster progression on all terrain.

TWEEKEND™

We've extended the Baseline™ rocker all the way out to the absolute ends of the board, and for good reason! This unlocks new ride-able surface area and gives you a bigger, more stable platform to press, float, and land on.

SHAPES, CONSTRUCTIONS, AND K2 EXCLUSIVES

HYBRITECH™ CONSTRUCTION

Hybritech™ is the most efficient way to make a snowboard without sacrificing performance. Featuring sidewalls along the running surface that flows into the tip and tail; reducing swing-weight, optimizing turn initiation, and providing unrivaled durability.

BASES

CARBON INFUSED 5500 SINTERED BASE

Fast, light, and strong. Our Carbon Infused 5500 Sintered base is the cream of the crop. By adding carbon to a sintered base, we've increased wax retention and decreased drag for a faster, smoother ride.

SINTERED 4000 BASE

Our Sintered 4000 base absorbs wax deep into the material for relentless glide and unrivaled durability.

CORES / LUMBER

BAMBOOYAH™ BLENDED CORE

Taking influence from skateboard manufacturing, our Bambooyah™ Blended cores are stronger than hell and come packed complete with a five year warranty.

BAP CORE

We've blended three species of renewable timber to assemble a core that's strong, lightweight, and designed to enhance dampening without the addition of other materials.

CORE ADDITIVE

OLLIE BAR™

Built in place in a pre-loaded cambered shape and placed between the binding inserts, the Ollie Bar™ silences the myth that rocker boards don't have the same pop that cambered snowboards do.

CARBON TORQUE FORKS™

Adding carbon that extends from the inserts to the contact point allows for an extra responsive and stable ride.

GLASS TECHNOLOGY

ICG™ CARBON GLASS

Integrating tip-to-tail carbon fiber stringers into fiberglass layups ensures a smooth power release in and out of turns while increasing pop, liveliness, and longevity of the snowboard without adding unnecessary rigidity. We offer ICG™ Glass in two variations; ICG™ 10 Biax and ICG™ 20 Triax.

INKED GLASS™

The lightest way to get a top quality graphic on a snowboard. This process fuses the graphic inks directly into the fiberglass in one seamless step that increases durability and removes the need for an additional plastic topsheet.

VOLUME SHIFT™

We've moved volume from the tips and tails of traditional snowboard shapes and placed it underfoot where it can be better controlled. This makes a wider, shorter design that maintains the same float and stability of a traditional board, but increases mobility and maneuverability. More slashing and better lines in the trees are now a reality.

EXTRUDED 2000 BASE

Our Extruded 2000 base delivers a consistent glide and is easy to maintain and repair.

ASPEN CORE

A single species of wood ensures a proven flex, durability, and snap.

RHYTHM CORE

Uniquely shaped and designed to complement the mechanics, geometry, and riding style of female snowboarders.

NOODLE CORE

Our youth cores are specifically designed and tailored to the weight and overall size of the next generation of rippers.

CARBON DARKWEB™ -

A carbon fiber lay-up that aids in energy transfer and stability, speeding up edge-to-edge transitions and keeping you in control in times of need.

HONEYKOMB™

A urethane-skinned Honeycomb™ additive aids in bonding strength and increases durability.

TRIAxIAL GLASS

A glass laminate with diagonal layers that adds torsional stiffness for increased stability and improved edge hold. The fibers three layers of fibers are woven at 45°, 45°, and 0°.

This makes for a more responsive ride longitudinally and torsionally.

BIAXIAL GLASS

Smooth all-purpose performance with a no-frills design. Fibers are woven together at 0° and 90°, creating a more forgiving flex pattern.

WARRANTY

K2 warrants this product to be free from defects in materials and workmanship for a period of (1) year from the original date of purchase at retail.

100% TOOL-LESS ADJUSTMENTS

K2 warrants this product to be free from defects in materials and workmanship for a period of (1) year from the original date of purchase at retail.

CHASSIS

SPLITBOARD-SPECIFIC ALUMINUM

Based off a tried and true splitboard baseplate, this chassis works with a splitboard puck-mount system and features an easy-to-use rail and hook system for the interchange between walk and ride modes.

PROFUSION™

Simple, tough, and lightweight, the ProFusion™ chassis is the go-to standard in the K2 binding collection. On-board tool-less power ramp and toe strap adjustments are paired with multiple ankle-strap mount points to help dial in perfect fit and ideal power transfer.

TRIPOD™

A way to rethink the traditional binding baseplate design. Designed to act as the most biomechanically efficient chassis possible, the TriPod™ baseplate features power transmission pods that coincide with the three points of contact of the foot and is designed to flex the way that the foot is naturally meant to.

HIGHBACKS

GAP ERASER™

Gap Eraser™ technology completely eliminates all gapping between boot, highback, and heelcup, creating an even stronger bond between you and your snowboard.

TWEAKBACK™

Tweakback™ highbacks are constructed using an injected urethane that is formulated to perform in cold temperatures and will allow you to flex the highback to its limit without any distortion.

A-LINE™

Our female-specific A-Line™ chassis is a one-piece design for lightweight performance, power, and comfort. This polycarbonate baseplate was designed in collaboration with our Women's Alliance product group and is fully outfitted with tool-less adjustment for a custom fit.

CLICKER™ STEP-IN

The original Clicker™ bindings, reintroduced with a canted footbed. Crafted out of lightweight aluminum, the Clicker™ system is the most time-tested step-in system on the market.

ALL-TERRAIN

The most durable temperature resistant highback shapes that make every K2 binding model perform best for its designed purpose. Available in both Nylon and Polycarbonate materials.

ECLIPSE™ HIGHBACK

Slightly shorter than it's men's counterparts and uses female-specific geometry to ensure maximum comfort and performance.

STRAPS AND ADDITIVES

SENDER™

Padless and responsive. The Sender™ ankle strap is a comfortable and low-profile ankle strap that was built to optimize power transfer and look damn good.

BENDER™

Twist and shout. Our Bender™ strap is our most flexible padless ankle strap option. We created it with the aim to improve freestyle mobility and help you tweak until those bindings creak.

CUSTOM CADDI™

The foundation of our strap offering, this proven design features durable PU laminates.

PERFECT FIT™ 2.0

Fitting good and looking better. The Perfect Fit™ 2.0 Strap's engineered to provide maximum adjustability, and fit each and every boot, no matter the brand.

PERFECT FIT™

Hinged design fits any boot toe shape, holds well, and sits in a low-profile configuration.

CAM LOCK™ CENTER ADJUSTING

Center and adjust your straps with your gloves on.

HINGE MOUNT™

The hinge mount ensures your straps easily stay out of the way.

TOOL-LESS UNIVERSAL™

Tool-less adjustment allows for on-board, on-the-fly changes.

RATCHETS

NEW! ULTRA RADCHET™

Lightweight fixed-pivot aluminum ratchet constructed from T6061 Aluminum.

HELLA RADCHET™

Large release lever for super easy exit and resin composite construction for lightweight durability.

EZ FEED RATCHETS™

A wider, tapered ladder opening allows for the easiest of entry.

FOOTBED & DISC

3° CANTED FOOTBED

Canted 3° to match your natural leg position during riding. More support to the outside of the foot provides improved control while reducing fatigue.

ADJUSTABLE POWER RAMP

Tool-less adjustment design built right into the integrated, full coverage, seamless EVA footbed.

K2 & BOA® PARTNERSHIP

THE ORIGINAL BOA® BOOT COMPANY

Introducing BOA® lacing systems to the snowboard market well over a decade ago, K2 believes that now, more than ever, BOA® is a standout advantage.

SHELL LACING

FOCUS AND ZONAL BOA®

A two reel BOA® system that allows for the upper and lower zones of the boot to be tightened independently.

BOA® AND BOA® COILER

A cable and reel based lacing system that creates even tension and easy lacing operation. This system features low friction guides for even tightening. BOA® Coiler works to automatically retract lace slack so your boots stay nice and neat.

TRADITIONAL LACE

No wires, reels, or pulls needed. Our braided textile laces offer a tried and true feel and customizable fit.

LACE LOCK

Positioned at the transition to the instep to give you a quick and easy ability to zonally lace your boots and keep them that way.

LINER SYSTEMS

BOA® CONDA™

A patented K2 liner lacing system that uses a urethane harness to gently hug your ankle, creating unrivaled heel hold. Boa® Conda™ allows for adjusting liner tightness and heel hold on the fly from outside of the boot, even with gloves on.

BOA® MOBILITY CONDA™

Everything you love about BOA® Conda™ with a narrower lace path that allows a bit more freedom to tweak.

3-POINT HARNESS

The 3-Point Harness is a straightforward solution that doesn't skimp on support. This system aims to optimize heel hold, while providing ankle support and unrivaled stability to help reduce fatigue.

REMOVABLE 3-POINT HARNESS

Now with the ability to choose your fit with our removable harness that locks to the shell to give you the choice of the amount of hold you want. Found on the Taro Tamai Snowsurfer and TT Women's models.

FAST-IN

No frills adjustment and locks solid for all day fit and comfort. Easy to use and comfortable all day long.

BOOTS/TECHNOLOGY

OUTSOLES

VIBRAM® ROLLSOLE OUTSOLE

Designed with mobility in mind, the Roll Sole™ Outsole aims at providing additional range-of-motion without sacrificing any support. This outsole is ergonomically shaped and allows riders additional maneuverability for next-level heelside carves and surf-style vibes.

VIBRAM® MOUNTAINEER OUTSOLE

The Mountaineer outsole is the first of its kind. An outsole designed specifically for snowboarding and the mountaineering that is required to get to those larger-than-life lines. With Vibram® rubber and a traditional lug design, this crampon compatible outsole is built to work with all the gear you need.

VIBRAM® V4 OUTSOLE

We've combined decades of experience with the knowledge of Vibram® to create a rough and rugged outsole focused on durability, weight reduction, grip, and a classic design.

VIBRAM® PRO LIGHT OUTSOLE

Combining the ultra grip and durability of Vibram® with K2's rider insight, the Pro Light outsole is lightweight and built to last.

ROLLSOLE™ OUTSOLE

The RollSole Outsole aims at providing additional range-of-motion without sacrificing grip or support. This outsole is keeps the overall weight of the boot down while offering extra mobility side to side.

LINER CONSTRUCTION

K2 AND INTUITION®

Using Intuition® EVA, a patented foam developed specifically to be lightweight, moldable, flexible, and durable, K2 aims to create the most comfortable and best performing snowboard boot liners in the world.

THERM-IC® HEATED LINERS

Integrated heating system to keep your feet warm on the coldest of days. Warmth and blood flow increases mobility and ensures all day comfort for top to bottom ripping. Three heat settings provide warmth up to 19 hours, and fully charges in 7 hours with a USB cable.

3 AVAILABLE HEAT SETTINGS – Keep feet warm for up to 17 hours.

INTEGRATED BATTERY – With USB charging adapter.

ZONAL HEATING ELEMENT – With insulated liner, keeping feet warm and comfortable.

CHARGING INSTRUCTIONS

1. Plug the charger into a socket. The charge indicator will light up green.
2. Plug the charging connector of the boot into the charger, charge indicator will be red.
3. Allow battery pack to charge for 6-7 hours, or until charge indicator light is green.
4. Go snowboarding.

NOTE: This lithium-ion battery can be charged in any state, as it has no memory effect. The battery should be charged to at least 50% and unplugged in times of travel and extended period of storage.

RUBBER LIGHT OUTSOLE

Full rubber bottom for maximum grip, durability, and impact absorbing Harshmellow™ technology.

LOW PRO OUTSOLE

A lightweight solid rubber cupsole that grips hard and lasts long.

CLICKER™ LIGHT OUTSOLE

Focused on maximum function of the Clicker™ mechanism and optimized for lightweight traction. This outsole features a urethane midsole for damp power transfer from the Clicker™ components to your foot.

BRIGHT FUTURE OUTSOLE

Lighting up the stoke and fun for groms everywhere, this LED light powered outsole is built to be lightweight and have tons of grip for lasting the whole day.

INTUITION® SPACEHEATER™

A liner designed for comfort and warmth, from start to finish. It features reflective heat blanket panels that work to trap heat in and keep cold out. These reflective heat blankets work alongside heat moldable Intuition® foam, internal J-Bars, and 3D molded, dual-density EVA insoles to keep your foot comfortable and warm all day long.

INTUITION® PRO FOAM 3D

Our most supportive liner, featuring a high-density Intuition® foam for added support without sacrificing comfort. This liner features both internal and external J-Bars around the ankles, where extra support is needed.

INTUITION® CONTROL FOAM 3D

Built with a blend of high and medium density Intuition® foam, this is our most versatile liner. With internal and external J-Bars and a 3D molded EVA insole, the Control Foam 3D liner is built to provide all-day comfort and support.

INTUITION® COMFORT FOAM 3D

Built for comfort and long-lasting fit, this liner is a softer build and features both internal and external J-Bars for added ankle support and heel hold.

COMFORT FOAM EVA

Focused on out-of-the-box fit and lasting comfort, the Control Foam liner has a forgiving flex and is packed with internal J-Bars for added ankle support.

BOOT MATERIALS

We've added premium materials to our snowboard boots to ensure that your boots put in as much work as you do.

REINFORCED RUBBER

Abrasion resistance reinforced outsole rubber is placed in areas of high stress to extend the life of the boot and increase durability.

HDR PREMIUM SYNTHETICS

Eight times more durable than a standard polyurethane material, HDR Premium Synthetics is a proprietary synthetic durable finish designed for extreme conditions. The dynamic resin system provides exception abrasion and durability performance well beyond standard synthetic materials.

SPACEHEATER™ FOOTBED

Stitched to the bottom of the upper, a layer of thermal-reflective SpaceHeater™ material helps to add bonus warmth to the boot without extra bulk or weight. Found on Maysis, Renin, Ender, Holgate, Thraxis, Aspect, Taro Tamai Snowsurfer, Contour, Estate, TT Women's

HARSHMELLOW™

Harshmellow™ is a magical dampening system that replaces industry standard foam dampening materials. Harshmellow dampens the specific target vibration for each product and works to create the smoothest ride imaginable.

LASTING

K2 Snowboarding uses a 1-to-1 lasting system for every liner and shell throughout the entire collection. This ensures the customer will get the best possible fit when they put their foot into a K2 snowboard boot.

TRADITIONAL LAST

Our Traditional Last is based around a D Last with 11° of forward lean. Available on Boundary, Lewiston, Darko, Raider, Market, Sapera, Haven, and Belief models.

Performance Last | Our Performance Last is based around a D Last through the forefoot with a more performance-focused heel pocket, and also features 11° of forward lean.

Available on Aspect, Thraxis, Holgate, Renin, Ender, Maysis, Estate, Contour, and Compass models.

WIDE LAST

Our Wide Last is based around an E & ½ Last with 11° of forward lean. Both shell and liner at 7mm wider than our traditional last and boot shell. Available on Maysis Wide.

6+3 LAST

A more relaxed last, our 6+3 Last features 6° of forward lean with 3° of medial lean. Available on Taro Tamai Snowsurfer and TT Women's models.
